

I'd like to voice my comments and support for KLOVE and the FM Translator service. I listen to KLOVE, as well as others in my community, each morning to get my day started. Prior to KLOVE, I didn't even turn the radio on. There was nothing but negative and ugly news and driving information. With KLOVE, my morning gets started with upbeat, positive, loving music that ends up being shared with my peers at work. My spirituality has grown significantly listening to the praise music on KLOVE. I hear from my friends that they were having a bad day and wanting to voice negative comments to someone, and then they heard a song on KLOVE that just totally turned them around. Without this, something different may have happened in their life, and to another individual that day. On All Saints Day last year, our church put the music of "I Can Only Imagine" to a video presentation of all the people in our church that have died over the years. It was a heartwarming experience, as we viewed these pictures and listened to this song. Now, each time someone from our congregation is listening to KLOVE and this song comes on, we remember all those we have lost to the Lord. KLOVE is a strong voice in our community and needs to continue to be heard loud and clear. Thank you for your time and listening through a servant of the Lord!
